The Tropical and Subtropical Fisheries Technological Society of the Americas is a professional, educational association of fishery technologists interested in the application of science to the unique problems of production, processing, packaging, distribution, and utilization of tropical and subtropical fishery species.

These papers are compiled and reproduced with limited editions and without formal review by the Florida Sea Grant College Program. Content is the sole responsibility of the author(s). The Conference intent is to compile preliminary results from ongoing research and advisory services to facilitate communication between regional investigators, industries, and government entities. Reproduction in this Proceedings does not preclude supplementation and further publication of work in reviewed journals or similar productions.
