Availability of Cited Documents

Non-USDA Patrons

The materials listed in this bibliography are available on interlibrary loan through your local library. The librarian in your public, state, university or corporate library can assist you in obtaining materials either in your area or directly from the National Agricultural Library at the address below. Current charges are:

- Photocopies:** \$5.00 for the first 10 pages
\$3.00 for each additional 10 pages
- Microfiche:** \$5.00 for the first fiche
\$3.00 for each additional fiche
- Microform:** \$10.00 per NAL-owned reel of microfilm

Invoices are issued quarterly. Requests must comply with the National or International Interlibrary Loan Code. Questions about the availability of these materials may be directed to:

Lending Branch
National Agricultural Library
10301 Baltimore Blvd.
Beltsville, MD 20705
(301) 344-3755

USDA Patrons

The materials listed in this bibliography may be obtained by submitting one Form AD-245 for each item requested to your local Agency or Regional Document Delivery System Library or directly to the address above.

Pacific Islands Gray Literature Project

In the fiscal year 1988, The Center for Tropical and Subtropical Aquaculture (CTSA) in Hawaii established the Pacific Regional Aquaculture Information Service for Education (PRAISE). The overall goal of the PRAISE program is to enhance information transfer within the Pacific Region.

One impediment to information access in the Pacific is the inaccessibility of "gray literature." A wealth of reports is produced throughout the Pacific that is never integrated into the standard literature vehicles such as journals or conference proceedings. This is a disservice to the Pacific aquaculture community for two reasons. One, valuable data is not shared throughout the region. Two, important work done in the region is not shared with the rest of the scientific community and so regional work does not get the recognition that it deserves.

Although the *Aquatic Science and Fisheries Abstracts* (ASFA) database serves as an invaluable information source for the aquatic research community, it does not strongly address the area of "gray literature." Gray literature is the body of reports, studies, surveys, workshops, etc. produced by local government agencies, private organizations and educational facilities that is not widely disseminated. These documents often contain valuable and unique information that is not found elsewhere. The inaccessibility of gray literature is a particularly serious problem in the Pacific, where there are relatively few libraries and other organizations responsible for the collection and dissemination of information. Because of this situation, there is a large body of scientific and economic information that is seldom accessed by the world's aquatic research community.

This ongoing project addresses several issues important to the dissemination of aquatic information, namely, access, delivery, and archiving. The Gray Literature Project provides the aquatic research and industrial community with bibliographic access to unique and usually unavailable information and preserves that information for future use.

Under the leadership of PRAISE, six organizations entered into a cooperative agreement to establish a system that gathers and disseminates aquatic "gray literature" from the U.S. affiliated Pacific islands. Development of this project directly addresses several key objectives identified as important to the overall effectiveness of the PRAISE program.

- Develop and disseminate "information products" that meet specific information needs of the Pacific Region;
- Increase end-user access to the information contained in aquaculture-related databases;
- Increase the accessibility of scientific information to the aquaculture community; and
- Increase the support base for the project through cooperative agreements with other agencies and information facilities.

Scope

This project attempts to gather literature that deals with factors affecting the marine and aquatic environment of the Pacific Islands. The scope of the project includes aquaculture, fisheries, coastal zone management and environmental effects related to tourism, social and cultural issues.

Methods

The documents are gathered from the Pacific region by members of the University of Hawaii Sea Grant Pacific Program (Pacific Aquaculture Development Program) and the Pacific Island Network. Material is reviewed by PRAISE and distributed to the Aquaculture Information Center of the National Agricultural Library (AIC/NAL), Cambridge Scientific Abstracts (CSA) and, when appropriate, the National Oceanic and Atmospheric Administration (NOAA) Library and Information Services Division (LISD) of the Department of Commerce. Material is indexed in both the *Aquatic Science and Fisheries Abstracts (ASFA)* and NAL's database *AGRICOLA*. Hard copy of the material is integrated into the collections of both NAL and Hamilton Library, where it is available via interlibrary loan.

Acknowledgments

This informational product is a cooperative project of the Pacific Regional Aquaculture Information Service for Education at the University of Hawaii, coordinated by David E. Coleman; the Library and Information Services Division of the NOAA Central Library, coordinated by Carol Watts, Director of Library and Information Services Division and Janice Beattie, Chief Regional Libraries Branch; and the Aquaculture Information Center, coordinated by Eileen M. McVey at the National Agriculture Library.

The authors acknowledge the Center for Tropical and Subtropical Aquaculture, NOAA, and the Pacific Aquaculture Development Program for financial support of this project. Financial support for this project was provided in part by the Center for Tropical and Subtropical Aquaculture through a grant from the U.S. Department of Agriculture (U.S.D.A. grant number 92-38500-7262).

This document is funded in part by a grant/cooperative agreement (NA36RG0259) from the National Ocean and Atmospheric Administration, project A/AS-4b, with technical assistance funds from the Office of Territorial and International Affairs of the U.S. Department of Interior. UNIHI SEAGRANT-PL-96-01.
