CORAL REEF POPULATION BIOLOGY

**CIRCULATING COPY
Sea Grant Depository**

Edited by

PAUL L. JOKIEL
ROBERT H. RICHMOND
REBECCA A. ROGERS

Dedicated to the memory of

EDWIN W. PAULEY

*Results of the 1983 Summer Research Training Program
Held at the Hawaii Institute of Marine Biology
Sponsored by*

EDWIN W. PAULEY FOUNDATION
UNIVERSITY OF HAWAII FOUNDATION
UNIVERSITY OF HAWAII SEA GRANT COLLEGE PROGRAM
HAWAII INSTITUTE OF MARINE BIOLOGY

Hawaii Institute of Marine Biology Technical Report Number 37
Sea Grant Cooperative Report UNIHI-SEAGRANT-CR-86-01
May 1986

Table of Contents

	page
Dedication to Edwin Pauley-----	v
Foreward by P. Helfrich-----	x
List of Student Participants-----	xii
List of Staff Members-----	xiv
Acknowledgments-----	xv
SECTION I. INTRODUCTORY MATERIAL	
Holthus, P. F. Structural reefs of Kaneohe Bay, Hawaii: an overview-----	1
Holthus, P. F. Coral reef communities of Kaneohe Bay, Hawaii: an overview-----	19
Dade, W. B., and T. Honkalehto. Bryozoan assemblages in modern coral reefs of Kaneohe Bay, Hawaii-----	35
Dade, W. B., and T. Honkalehto. Common ectoproct bryozoans of Kaneohe Bay, Oahu-----	52
SECTION II. KANEOHE BAY REEF POPULATIONS IN TRANSITION	
Holthus, P. F., C. W. Evans and J. E. Maragos. Coral reef recovery subsequent to the fresh water kill of 1965-----	66
Evans, C. W., J. E. Maragos, and P. F. Holthus. Reef corals in Kaneohe Bay. Six years before and after termination of sewage discharges (Oahu, Hawaii Archipelago)-----	76
Alfaro, P. M. A comparison of coral community structure on reef flats in Kaneohe Bay, Hawaii-----	91
Jokiel, P. L. Growth of the reef coral <u>Porites compressa</u> on the Coconut Island reef, Kaneohe Bay-----	101
Guinther, E. B., and M. L. Bartlett. A note on comparative quadrat sampling for the infaunal and epifaunal invertebrates, 1968-71 and 1983, on the Coconut Island reef flat, Kaneohe Bay, Oahu, Hawaii-----	111
SECTION III. GENETIC STRUCTURE OF CORAL REEF POPULATIONS	
Heyward, A. J., and A. Stoddart. Genetic structure of two species of <u>Montipora</u> on a patch reef: conflicting results from electrophoresis and histocompatibility-----	123
Hunter, C. L., and C. C. Kehoe. Patchwork patch reefs: the clonal diversity of the coral <u>Porites compressa</u> in Kaneohe Bay, Hawaii-----	124
Stoddart, J. A. Biochemical genetics of <u>Pocillopora damicornis</u> in Kaneohe Bay, Oahu, Hawaii-----	133

Hidaka, M. Tissue compatibility between colonies and between primary polyps of <u>Pocillopora damicornis</u> : preliminary study-----	151
SECTION IV. PATTERN OF REPRODUCTION IN CORAL REEF POPULATION	
Holloran, M. K., and G. J. Wittenan. Diurnal periodicity in planula release by the reef coral <u>Pocillopora damicornis</u> -----	161
Holloran, M. K. The relationship between colony size and larva production in the reef coral <u>Pocillopora damicornis</u> -----	167
Heyward, A. J. Sexual reproduction in five species of the coral <u>Montipora</u> -----	170
Wright, M. H. Aspects of reproduction and planula development in the reef coral <u>Cyphastrea ocellina</u> -----	179
Martin-Chavez, E. Gametogenesis and origin of planulae in the hermotypic coral <u>Pocillopora damicornis</u> -----	193
Hodgson, G. Preliminary observations on the abundance and distribution of planktonic coral larvae in Kaneohe Bay, Oahu, Hawaii-----	206
Esquivel, I. F. Direct retrospective analysis of the reef coral <u>Porites compressa</u> : evidence for sexual vs. asexual origins of reef coral populations-----	234
Stoner, D. The role of fragmentation in the colonial, algal-bearing didemnid ascidian <u>Diplosoma similis</u> -----	240
Fitzhardinge, R. Spatial variation in the recruitment of corals and other organisms in Kaneohe Bay, Oahu-----	263
Smith, L. C. Larval release in the sponge <u>Callyspongia diffusa</u> -----	286
SECTION V. INTERACTIONS AMONG CORAL REEF SPECIES	
Castro, P. Symbiosis in coral reef communities: a review-----	292
Coles, S. L. A guide to animals symbiotic with reef corals in Hawaiian waters-----	308
Cox, E. The effects of predation on growth and competition in the corals <u>Montipora verrucosa</u> and <u>Porites compressa</u> -----	321
Glynn, P. and D. A. Krupp. Feeding biology of a Hawaiian sea star corallivore, <u>Culcita novaeguinae</u> : Muller and Froschel-----	330
Chadwick, N. E. Aggressive interactions of the solitary coral <u>Fungia scutaria</u> (Lamarck)-----	350
Jonasson, M. W. Cleaning behavior comparison of two shrimp species (<u>Stenopus hispidus</u> and <u>Lysmata grabhami</u>)-----	361
Santavy, D. A blue-pigment bacterium symbiotic with <u>Tetraspora granulosa</u> , a coral reef sponge-----	380

Smith, L. C. A preliminary report on the histology of allograft rejection in the marine shrimp <i>Callinectes diffusa</i> -----	394
Kitalong, A. The microfauna associated with three species of coral and their accessibility to a reef community-----	401
Kitalong, A. A preliminary study on the emergence patterns of microfauna in Kaneohe Bay, Hawaii-----	414
SECTION VI. PHYSIOLOGY OF THE CORAL-ZOOXANTHELLA RELATIONSHIP	
Anderson, S. L. Glutamine synthetase activity in the symbiotic dinoflagellate <i>Symbiodinium microadriaticum</i> -----	424
Read, L. Effects of varying solar radiation intensities and ultraviolet radiation growth rates of <i>Symbiodinium microadriaticum</i> isolated from different hosts-----	430
Scelfo, G. Relationship between solar radiation and pigmentation of the coral <i>Montipora verrucosa</i> and its zooxanthellae-----	440
SECTION VII. CORAL REEF POPULATIONS AND TOXIC WASTE	
Howard, L. S., and D. G. Crosby. Evaluation of some methods for quantitatively assessing the toxicity of heavy metals to corals-----	452
Esquivel, I. F. Short term bioassay on the planula of the reef coral <i>Pocillopora damicornis</i> -----	465
Glynn, P., L. S. Howard, E. Corcoran, and A. D. Freay. Preliminary investigations into the occurrence and toxicity of commercial herbicide formulations in reef building corals-----	473
York, R. B. Isolation and culture of symbiotic algae-----	486
VIII. MATHEMATICAL MODELS	
Martinelli, P. J. Time-series analysis of biological data-----	488
