Irish-American
TECHNICAL EXCHANGE
ON THE AQUACULTURE OF ABALONE • SEA URCHINS • LOBSTERS AND KELP

November 17-19, 1992 • Galway, Ireland • Martin Ryan Institute
Communications Coordinator
Margaret Stewart Van Patten

Designer
Judith Ricketts-White

Acknowledgements

Many dedicated individuals helped to make this publication a reality. The Connecticut Sea Grant Publications Office wishes to thank the conference organizers for originating the concept, and thank the international authors for their promptness and cooperation. Special thanks go to Ken Sherwood, Karen Massaro, and Dolores Chambers for their assistance in editing and proofing manuscripts.

The Connecticut Sea Grant College Program is part of a national network of university-based programs in coastal and Great Lakes states, established by Congress in 1966 and modeled after the Land Grant Colleges, administered through the National Oceanic and Atmospheric Administration (NOAA) and supported by federal and state funds. Connecticut Sea Grant fosters the wise use of marine and coastal resources through research, outreach, and education.

This publication is funded by a grant from the National Oceanic and Atmospheric Administration (NOAA), U.S. Department of Commerce via Sea Grant No. NA90AA-D-SG443, M/PD-2. The views expressed herein are those of the authors and do not necessarily reflect those of NOAA or of any of its sub-agencies.

Ta'n Fharraige ar Buile

I'll sing to you about Haliotis
How very, very slow its growth is!
You can feed it lots of Hymenomonas
But you'll never make money for its owners....

Allelu, Buile lu, ta'n Fharraige ar buile
Allelu, Buile lu, ta'n Fharraige ar buile!

When you grow bigger Abalones
You'll need some more financial loans!
Let you give it dilisk or feed it kelp
But three years on you may still need help...

Allelu, Buile lu, ta'n Fharraige ar buile...!

So deep in your pockets you end up searchin'
-why don't you try to grow an urchin!
They say it lives in Lithothamnion
-then why can't you grow it under salmon?

Allelu, Buile lu, ta'n Fharraige ar buile...!

Ode to Lobsters

For young lobsters and men my advice is
Try avoiding the middle age crisis
Cut down on the salt
Build up on Old Malt
To postpone that terminal ecdysis.
Table of Contents

The Irish American Aquaculture Initiative
J.P. Mercer, E.C. Monahan............................................. 1

**Abalone and Other Mollusks**

Abalones – The Irish Ongrowing Experience
J. Hensey................................................................. 5

Getting Started in Commercial Abalone Ongrowing
M.P. Ward............................................................. 7

Comparative Studies on the Nutrition of the Two Species of Abalone,
*Haliotis tuberculata*, and *Haliotis discus hannai*
K. Mai, J.P. Mercer, J. Donlon.................................. 9

Heritability of Growth Rate in the Northern Quahog, *Mercenaria mercenaria*
(Linnaeus, 1758)
J.W. Greshaw, Jr., P.B. Hefferman, R.L. Walker........... 10

Preliminary Studies on the Effects of Stocking Density and Biomass on Growth
of the Juvenile Omer, *Haliotis tuberculata*
Y.D. Mgaya, J.P. Mercer........................................... 16

The Beals Island Regional Shellfish Hatchery: A Community-Based Clam (*Mya arenaria*) Stock Enhancement Program in Downeast Maine
B.F. Beal................................................................. 18

Abalone Conditioning, Spawning Techniques, and Nursery Systems at the
Shellfish Research Laboratory, Carna
K. Moylan, J.P. Mercer............................................... 23

Enhancing Digestion in Marine Snails and Echinoderms by Exposure to
Specific Food Sources
M. Polne-Fuller....................................................... 25

Abalone, Sea Urchins and Stocked Lobsters: An Income Supplement for
Inshore Shellfish Fisherman
D. Bates................................................................. 27

**Sea Urchins**

Growth and Biochemical Composition in the Purple Sea Urchin,
*Paracentrotus lividus*, Fed on Selected Macroalgae
K. Mai, J.P. Mercer................................................... 33

The effect of Macroalgal Diet on Gonad Condition of the Purple Sea Urchin,
*Paracentrotus lividus*, in Suspended Culture
G. Burnell, S. O'Sullivan, E. Rice................................ 34

Development Rates and Morphometric Measurements of Sea Urchin Larvae
(*Paracentrotus lividus* Lamarck) Using Different Microalgal Diets
P. Leighton, T.W. Burke, J.P. Mercer............................ 36

Recruitment Trials for the Sea Urchin *Paracentrotus lividus* of the West Coast
of Ireland Based on a Natural Spat Collection Programme
E. Moylan.............................................................. 38
Algae and Algal Herbivores

Ground Water as an Algal Culture Medium in North Clare
C. Roden ........................................................................................................... 47

The Proposed Northern Ireland Centre for Marine Resources and Mariculture
P.J.S. Boaden ..................................................................................................... 48

The Effectiveness of Callistosoma zizyphinum (Gastropoda) in Controlling
Mariculture Mesh Fouling
J.P. Johnston, P.J.S. Boaden .............................................................................. 49

Effects of Temperature on Reproduction in an Atlantic Kelp, Laminaria
longicurvis, in the North Atlantic Ocean
M. Van Putten, C. Yarish, L. O'Mallette ......................................................... 50

Biotechnology in Seaweed Research and Aquaculture
M. Polte-Fuller .................................................................................................. 52

Lobsters

Lobster (Homarus americanus) Culture in Maine: A Community Based
Fisherman-Sponsored, Public Stock Enhancement Program
B.F. Beal, S.R. Chapman, C.J. Irvine, R.C. Bayer ........................................... 57

Control of Gaffkemia in Lobsters Held in High Density Confinement
R.C. Bayer, M.B. Loughlin, D.L. Prince ......................................................... 65

Ciliated Protozoan Disease in Lobster, Homarus americanus
M.B. Loughlin, R.C. Bayer, D.L. Prince ......................................................... 65

Shell Disease in the American Lobster, Homarus americanus
D.L. Prince, R.C. Bayer, M.B. Loughlin ......................................................... 68

The Use of Artificial Reefs in Aquaculture and Fisheries Management
G. Burell ............................................................................................................ 70

Youth and Aquaculture: Learning Experiences and New Industries
J.K. Buttner ....................................................................................................... 72

Male Polymorphism, Reproductive Strategies, and Maintenance of Reproductive
Potential in Populations of Wild Crustaceans
H. Laufer, J. Abl, A. Sagi ................................................................................ 76

Problems of Reproduction in Freshwater Crayfish Under Culture Conditions
J.D. Reynolds .................................................................................................. 79

Lobster Stock Enhancement Project Shellfish Research Laboratory Carna
R. Browne, J.P. Mercer .................................................................................... 81
