International Conference on Sail-Assisted Commercial Fishing Vessels: Proceedings

John W. Shortall III

and

Billie H. Lowry
INTERNATIONAL CONFERENCE
ON
SAIL-ASSISTED COMMERCIAL FISHING VESSELS
Proceedings of a Conference
Held May 15-18, 1983
at Tarpon Springs, Florida

Sponsored by:
Florida Sea Grant College Program
University of South Florida, College of Engineering
Virginia Sea Grant Program - VIMS
and
The Society of Naval Architects and Marine Engineers (SNAME)
Assisted by:
Sail Assist International Liaison Associates (SAILA)

Compiled by:
John W. Shortall III

Edited by:
Billie H. Lowry

Sea Grant Project No. M/PM-2
Grant No. NA80AA-D-00038

Report Number 58
Florida Sea Grant College
May 1983
Price: $10.00
FOREWORD

This publication is a collection of papers accepted for presentation at the International Conference on Sail-Assisted Commercial Fishing Vessels. Four papers, missing from this publication will be published after the conference and mailed to the attendees. They rely on experimental data which is currently being collected. A few other papers were not received by the publication deadline and hence do not form part of these published proceedings.

In conjunction with this conference, a set of 331 abstracts has been published by Florida Sea Grant College from material assembled and edited by the College of Engineering of the University of South Florida. Copies of the publication, "Sail-Assisted Commercial Marine Vehicles -- Bibliography and Abstracts" (Technical paper 28), were given to conference participants and may be obtained by others for $2.00 from Florida Sea Grant College.

I want to thank all those who have made this conference possible including all of the authors here represented, the sponsoring organizations, members of the steering committee and the marine agents of the Florida Sea Grant Marine Advisory Program.

Conference Organizer:

John W. Shortall III, NA
University of South Florida
College of Engineering
Department of Chemical & Mechanical Engineering
Tampa, Florida 33620
U.S.A.

SPONSORING ORGANIZATIONS

Florida Sea Grant College
College of Engineering, Florida - College of Engineering, VIMS
The Society of Naval Architects and Marine Engineers

John Lucy, Virginia Sea Grant, College of William and Mary
Dr. John Sainsbury, Florida Institute of Technology & SNAME
Donald Sweat, Florida Sea Grant Marine Advisory Program
Chet Swenson, Chet Swenson Marine Engineers & SNAME
# TABLE OF CONTENTS

**FOREWORD**
John W. Shortall III .......................... ii

**SAILING FISHING VESSELS TODAY - PRACTICAL EXPERIENCES I**

- Review of Potential Sail-Assist Applications to Fisheries and Influence of Fishery Operations on Design .......................... 1
  John C. Sainsbury

- Sail-Assisted Fishing Vessels: Results of Full Scale Trials ........ 28
  J.L. Armand, A. Morcheoine and D. Paulet

- Some Aspects of Sail Power Applications in the German Sea Fishery ....... 57
  K. Lange and P. Schenzle

**SAILING FISHING VESSELS TODAY - PRACTICAL EXPERIENCES II AND ARTISANAL CRAFT**

- The Philosophy of Fishing Vessel Sail Assistance .......................... 100
  Dag Pike

- Improvement in Hull and Rig of Tropical Fishing Boats - Kattumarams, Vallams and Double Hulled Boats .......................... 103
  E.W.H. Gifford and C.J. Gifford

- Sail Powered Pearl Fishing Catamaran: DMB .................................. 120
  Lock Crowther

- A State of the Art Sail-Assisted Fishing Vessel for the Third World .... 127
  Frank Crane, David A. Olsen, and August Ciell

**SAILING FISHING VESSELS TODAY - PRACTICAL EXPERIENCES III AND DESIGNS**

- A Modern Practical Seaman's Views on Commercial Sail .................. 132
  H.F. Morin Scott

  S. Langevin

- Preliminary Fishing Trials of a Sail-Powered Trimaran in New England Waters ................................................................. 168
  Richard C. Newick, John Todd and Sherill B. Smith

**SAILING FISHING VESSELS TODAY - ECONOMICS, DESIGN AND RETROFIT**

- Retrofit Sail-Assist on New England Fishing Vessels ............................ 178
  Clifford A. Goudey

*Statements contained in the articles herein are the private opinions and assertions of the writers and should therefore not be construed as reflecting the view of the sponsors, nor of any other organization with which the writers are affiliated.*
A Pacific Island's Fishing Vessel ........................................ 196
L.N. Neveils

Sail-Assisted Fishing Vessels for Gulf of Mexico, Caribbean and Near-
Atlantic Waters .......................................................... 214
John W. Shortall III

PERFORMANCE PREDICTION, ROUTING, STABILITY, INSTRUMENTATION

Linearised Performance Analysis of Sailing and Motor Sailing
Vessels ........................................................................ 259
C.J. Satchwell and James Mays

Safety and Stability Considerations for Sail Assisted Fishing
Vessels ......................................................................... 292
William E. Remley

Low cost, Micro-processor Based Power Conversion Instrumentation
Applicable to Sail-Assisted Commercial Fishing Vessels ............... 311
Hendrick W. Haynes, et al

ADVANCED WIND THRUSTERS AND SAILING RIGS FOR COMMERCIAL VESSELS

Advanced Wind Propulsion Devices-Current Status and Potential .... 362
Kenneth C. Morisseau

The Tunny Rig, A Variable Camber Flexible Wing Sail ................... 386
E.W.H. Gifford

Windmill Thrusters for Commercial Fishing Craft ....................... 393
B.L. Blackford

Fishing Vessels with the Aerosystems Wingsail ......................... 410
Jack Manners Spencer and Arthur Edmunds

Investigations into 2D Mast/Sail Interaction ............................... 425
Stuart Wilkinson

Wingsail - Auxiliary Ship Propulsion Systems ............................ 444
J. Walker

PAPERS FOR POST CONFERENCE PUBLICATION

Performance Measurements Aboard a 25 Foot Sail-Assisted Fishing
Vessel ........................................................................ 137
J. Walker

A Windmill Thruster Experiment
John Nickelsen, Jeffrey Dunlap, David Luke and Thomas Watts

Computer-Aided Instrumentation for Sailing Vessels
John W. Shortall III
